CEO	Lee Ki Sun	Phone	+82-52-278-9330
E-mail	kslee@dk-enc.co.kr		
Address	40-30. Yonjam-ro, Nam-gu, Ulsan, Korea		
major business	Oil&Gas Processing Equipments		

Manufacturing of Oil&Gas Processing Equipments such as Shell&Tube Heat Exchanger, Reactor, Pressure Vessel, Column, Skid&Module, etc.

Products

Hot Combined Feed Exchanger

Use Equipment of the Propane de-hydrogenation process

Description Heat exchanger to prevent tube crack due to tube corrosion by introducing hot hydrogen through the fine crevice in the tube to tube sheet joint

Catalysis Cooler

Use Regenerator catalyst cooling device for RFCC process

Description Regenerator catalyst cooling device in the refinery's crude refinery RFCC process

High Pressure Separator

Use High Pressure Internal Fluid Separator

Description The device for separating solids in a gas

Technical Capacity

» Inner Bore Welding

This is to prevent the hydrogen gas flowing in to the fine crack occurring on the tube and tube sheet caused by the crack corrosion on general heat exchanger applied to tube to tube sheet joint

» Manufacturing of Catalyst cooling device

Regenerator catalyst cooling device in the refinery's crude refinery RFCC process
