

# Seonghwa Industrial Co., Ltd

CEO	Lim Suk do	Phone	+82-55-970-0200
E-mail	bogyong.kim@seonghwa.co.kr		
Address	34-2, Jinma-daero 2498 beon-gil, Ibanseong-myeon, Jinju-si, Gyeonsangnam-do, Korea		
major business	industrial steel structure, overseas construction orders&services, building materials		

Seonghwa Industrial, as a leading pipe company, mainly concentrates on specializations of a module and businesses of pipe supports, and prefabricated piping. We have exported our technology and experience not only to power plants but also to petrochemical, marine equipment and LNG terminal around the world.

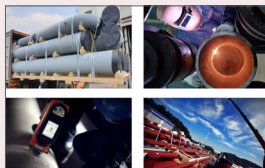

## Products

pipe supporter

**Use** Prevent external impacts

**Description** supporting power plant piping  
 - spring hanger: movement compensation by static load  
 - rigid strut: fixing pipes from dynamic loads(an earthquake)  
 - snubber: allowing movement of pipes during normal operation, fixing piping from dynamic loads such as an earthquake and a change of pressure by valve

prefabricated piping

**Use** transporting fluids for electricity production

**Description** prefabricated piping for power plant  
 - pipes for extreme environment(high pressure and temperature) for power plants  
 - providing products as a spool

skid module

**Use** a module for plant construction

**Description** module package for plant  
 - modular sub-structures separated by geometries/functions  
 - reduction of construction cost/period by avoiding field works

## Technical Capacity

### » One-stop solution

It can carry out all of design, fabrication, logistics and constructions for piping systems

### » SHES(3D Design program)

Design of pipes, steel structure and supporters by just a few clicks, our original program

### » Design of piping system

Verifying considered load through analytic and numerical calculation by an R&D department

### » Skid module

It can carry out all of manufacturing processes for piping systems and steel structures
