major business	Industrial Electronic Equipment Repair&Industrial Electronic Equipment Failure Prediction Solution		

Engstok Co., Ltd. is a specialized industrial electronic equipment repair company that offers maintenance services for inverters, PLCs, HMIs, controllers, servo drives, and all other electronic equipment used in industrial settings. Currently, we are developing an industrial electronic equipment failure prediction solution based on eight years of collected equipment repair data.

## Products

**Description** In factories and industrial settings dominated by foreign-made equipment, Engstok offers comprehensive inspection and repair services for equipment failures. Our team of specialized engineers conducts direct repair services, saving both time and costs compared to sending products overseas for repairs. This maintenance service also helps mitigate on-site economic losses through prompt repair solutions

**Description** When you need hard-to-find discontinued domestic and international parts and industrial electronic equipment, Engstok offers cost-effective procurement services. Leveraging our global partner network, we provide a comprehensive one-stop solution, including sourcing, inspection, importing, and delivery, making it easy to overcome seller challenges, trust overseas vendors, and navigate complex customs procedures

**Description** We're developing an advanced solution for industrial electronic equipment, utilizing real-time data and AI to proactively detect issues, identify faults, and predict equipment lifespan. This marks a shift from post-maintenance to proactive prevention, aiming to reduce downtime and improve efficiency in various industries, including manufacturing

## Technical Capacity

### » Direct Repair Service

When equipment failures occur in industrial settings, Engstok provides direct repair services. Our team of specialized engineers in various fields performs these repair services directly, ensuring swift resolutions

### » Domestic and International Discontinued Product Procurement Service

We specialize in sourcing rare domestic and international parts and industrial electronics through our global partner network, ensuring top-quality products at competitive prices. With one interaction, you gain access to a full service, from sourcing to delivery

### » Industrial Electronic Equipment Predictive Maintenance AI Solution

AI predicting equipment lifespan via real-time data is shifting to proactive maintenance, reducing downtime, and enhancing industrial efficiency
