

## NEO SEMITECH Co., Ltd.

CEO	Kim Sun Kak	Phone	+82-43-903-3900
E-mail	sk.kim@neo-semitech.com		
Address	RM#477 Industrial Technology Research Park Chungbuk National University("CBNU") 1 Chungdae-ro Seowon-gu Cheongju-si Chungbuk 28644, South Korea		
major business	Scale Power Cleaner, semiconductor equipment		

Neo Semitech is developing products to help customers through years of research and development. The eco-friendly water treatment equipment scale removal device, IoT-based SCS-8400, semiconductor equipment, and secondary battery businesses are growing rapidly.

### Products

Scale Power Cleaner

**Use** Eco-friendly cooling circulating water scale removal device using electrolysis

**Description** The unrefined water used in the factory contains calcium and Magnesium is bound, and it adheres to the inside of the pipe and is removed through electrolysis

SCS-8400

**Use** IoT-based Date Gathering Module

**Description** Various sensors such as vibration, temperature, and RPM are connected to a single board to monitor equipment status in real time, and preventive management as a warning or alarm

Full Auto Magazine Cleaner

**Use** Magazine cleaning

**Description** The magazine needs cleaning after one use, and by integrating the existing manual work, the development efficiency is improved with one equipment, and the cleaning time is shortened by spraying high-pressure D.I water directly to the magazine in various directions

### Technical Capacity

#### » Scale Power Cleaner

Eco-friendly technology that collects and automatically discharges scale components in the cooling circulating water through electrolysis

#### » Date Gathering Module

Technology that collects various sensor data such as vibration, humidity, temperature, and pressure of semiconductor equipment or general equipment and transmits it to the server in real time
