

# YEST

<b>CEO</b>	Jang Dong-Bok, Jang Im-Soo	<b>Phone</b>	+82-31-612-3333
<b>E-mail</b>	jekim@yest.co.kr		
<b>Address</b>	27, Masan 12-ro, Jinwi-myeon, Pyeongtaek-si, Gyeonggi-do, Republic of Korea		
<b>major business</b>	Furnace, Autoclave, Chiller, Chamber Etc		

YEST aims to design the future together with an endless spirit of challenge and value creation. YEST is a company specializing in electric heating equipment which is Mecca of 21st century display(OLED)/semiconductor electric heating equipment. Since establishment in 2000, YEST has continuously growing based on balanced business structure through a stable business portfolio.

## Products

**Use** Heat treatment  
**Description** Oxide furnace improves electrical properties by forming free electrons through chemical reactions in oxide TFTs through heat treatment

**Use** Static electricity elimination  
**Description** Static electricity elimination device applicable to high vacuum environment without damage to organic matter and impurities in the substrate

**Use** Plasma dicing  
**Description** Dicing process equipment using plasma for ultra-thin wafers with a cutting width of 20µm or less

## Technical Capacity

### » Heat control

YEST have unique heat source control technology  
 YEST have control technology from cryogenic to high temperature  
 Excellent temperature uniformity

### » Static electricity elimination technology

Completed development of technology capable of static electricity elimination in high vacuum environment without the effect of damage to organic matter and impurities

### » SCU(Super Cooling Unit)

Development of cryogenic new technology cooling system  
 Excellent technology to fast cooling speed

### » Plasma dicing

Completed development of high-quality, high-etch plasma etching technology capable of processing 300 mm wafers
