| major business | Design and Intergration of control system based on EPICS, Monitoring system of electrical facilities | | |

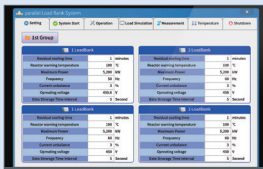

SN Co., Ltd. provides a power factor controller of electrical facilities and measurement solution. It also provides the system which processes and measures material surface and plasma processing control system.

Products

Data Collecting Device
(comEL-MINT)

Use Data acquisition from measuring instruments
Description Power quality analysis and optimization of energy management schemes

Loadbank controller

Use Testing of generators and power converters
Description Equipment for various power facilities when under a load

MPFC(comEL-GRIN)

Use Multi-channel power factor control system(comEL-GRIN)
Description Power factor controller of multiple distribution transformers

Technical Capacity

- » **EPICS Application for a Variety of Operating Systems**
 - EPICS application program based on the Linux operating system
 - EPICS application program based on the Windows operating system
 - EPICS application program based on a tablet(mobile system)
- » **System Integration based on a Programmable Logic Controller**
 - Ethernet IP Linking
 - IOc Control
 - Ladder program
- » **Control System which is Easy to Install and Operate**
 - Application program of Control System Studio(CSS)
 - Application 'dot net'(.net) program
 - Process control: IOc, PLC, EPICS, and HMI(PCs, tablets)
