

Fiber Optic Korea Co., Ltd.

CEO	Kim Yang Gon	Phone	+82-41-587-9911
E-mail	sale@fiber-optic.co.kr		
Address	#234, Mojeon 1 gil, Seounggeo-Eup, Seobuk-Gu, Cheonan-cigy, Korea		
major business	Optical lighting systems, industrial lighting, LED lighting systems, fiber optic sensors		

Fiber Optic Korea Co., Ltd. is a leading company specialized in optical industry. It is the only company in Korea that orders optical fiber for analysis such as plasma detection, fast ion detection, diagnosis, and visible light for optical fiber communication.

Products

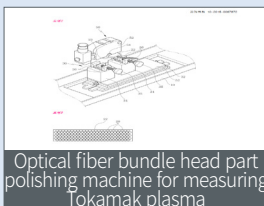

Optical module and fiber bundle for CES cassette

Description An optical module for carrying out various optical diagnostics simultaneously and an optical module for transmitting the optical signal acquired from the optical module to the diagnosis room

Fiber bundle for measuring tokamak plasma

Description Fiber bundle for measuring and analyzing plasma

Optical fiber bundle head part polishing machine for measuring Tokamak plasma

Description a device for polishing optical fiber surfaces
a jig for uniformizing the polishing state of the surface
a device for polishing a line-type arrayed optical fiber
