

Gas Power Co., Ltd.

CEO	KIM, Byeong Seok	Phone	+82 2-6111-6114
E-mail	gas@gaspower.co.kr		
Address	1101, Baeksang S.T. II, 459-22 Gasan, Keumcheon, Seoul, Korea		
major business	Ingersoll Rand(Formerly CAMERON) Turbo, Screw, Reciprocating Compressors and related machinery sales and maintenance		

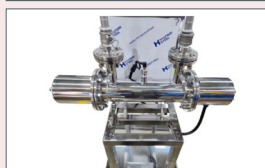

Since 2007, Gas Power Co., Ltd. has had abundant experiences in sales of compressors such as Cameron(Cooper, Joy), IR, CompAir, etc., and maintenance. It is a leading company in the field of Centrifugal Compressors, Oil Free Rotary Screw Compressors, Turbo Blowers and Siemens Motor, providing a total solution from engineering to maintenance.

Products

Centrifugal Compressor

Description It provides the highest efficiency and completely oil-free air, carefully designed with cutting-edge technologies and extensive engineering expertise

Tube Type UV-C LED Disinfection Device

Description Unlike existing disinfection devices with mercury ultraviolet lamps, UV-C LEDs emit only ultraviolet rays optimized for sterilization, and is effective in sterilizing more than 99.9% of E. coli, pathogenic microorganisms, bacteria, and viruses

Supercritical fluid manufacturing device for machining of difficult-to-cut materials

Description It is a new concept metal processing product that helps machining precision parts in the aerospace and defense industries where titanium and inconel are widely used, overcoming the non-eco friendly and harmful cutting oil used in the workplace

Technical Capacity

» Patent on composite bearing systems

A technology to share the axle load of the bearing by inducing high-pressure gas to flow between the discs

» Patent application for AI predictive maintenance platform

Providing predictive maintenance services for air compressors

» ESCO(Energy Service Company)

Providing comprehensive energy saving consulting

» Patent on a vapor-liquid separator using centrifugal collision

Generating a vortex to supply moisture-free dry air
