Address	4F, GENOA Building, 127, Dogok-ro, Gangnam-gu, Seoul		
major business	Response of infectious diseases, Infection control service, Hydrogen-Peroxide Plasma Environment Sterilizer		

Sterapy Co., Ltd. is the first and best spatial sterilization™ company in Korea that provides a total solution through spatial sterilization™ equipment and service development. The premium infection control service is expanding the target of spatial sterilization™ not only to specialized facilities but also to living spaces, office spaces, business spaces, and shared spaces for the general public, and we will continue to make more efforts to bring rich and healthy lives.

Products

DiHPAE21_E2

Description The latest model, capable of both environmental and surface sterilization, consists of the main body and two spray units(POD&GUN)
Automation control through the program and remote control are possible, and digital information of the sterilization process is recorded

DiHPAE21_S1

Description It is a model optimized for surface sterilization, and it is a practical equipment that can sterilize the environment in a small space
The main body is built integrally with a trunk with wheels for ease of movement

Technical Capacity

» Environmental sterilization

When the target space is filled with hydrogen peroxide solution, active oxygen species generated by decomposition of hydrogen peroxide penetrate bacteria, viruses, and fungi, destroying cell components, and performing 6Log level microbial decontamination

» DiH: Dry ionized Hydrogen-peroxide

A technology that applies an atmospheric discharge of 17.4 KV to hydrogen peroxide aerosol, ionizes it, and sprays it in the form of a dry-fog
