

APROKOREA Inc.

CEO	Jo Sung yoon	Phone	+82-31-477-7377
E-mail	casy@apro-korea.co.kr		
Address	3TH Floor, 63, Dangeong-ro, Gunpo-si, Gyeonggi-do, Republic of Korea		
major business	Manufacture of Dental Instruments and appliances		

APROKOREA is an RF specialized company established in 2006 as the manufacturer and distributor, we have own R&D Centre. Since then, We have exerted our utmost effort for Technology Development and Innovation throughout the past years. As a result, our equipment such as Korean RF ablation generator system have been proven to be user-friendly, effective, safe in the medical field through clinical studies and experiments, domestically. Currently, we are expanding our business abroad on the basis of such domestic reputation and our pride as a RF expert company and gradually gaining global attention.

Products

AK-P1014

Use Medical device
Description Using plasma energy to coagulate tissue

AK-PH1014

Use Medical device
Description The low Plasma is generated by Atmosphere pressure discharge is transmitted to skin tissue to suppress coagulation and bacterial infection

AK-PC1014

Use skin care
Description Plasma is generated by Atmosphere through the high voltage discharge part, and when the plasma touches the skin, waste and dead skin cells of the skin are removed to keep the skin elastic

Technical Capacity

» RF Generator

Using RF energy for coagulation or cut

» Electrode

Electrodes are used to operate with RF generator for coagulation and cut

» Plasma electrosurgical unit

Using plasma energy to coagulate tissue

» Plasma skin care unit

Using plasma energy to care skin
